

TENDER INTELLIGENCE

Illustrative Opportunity Assessment Report Planned Roofing Renewal Programme — North Manchester Housing Estates

Prepared for	Northfield Roofing & Building Ltd (fictional)
Report ID	PTI-EXAMPLE-001
Report date	31 August 2026
Prepared by	Pavilion (Stockport) Ltd

SHOWCASE REPORT — ALL CLIENT, BUYER, TENDER AND EVIDENCE DATA IS ENTIRELY FICTIONAL.

ILLUSTRATIVE EXAMPLE — FICTIONAL DATA

This public showcase demonstrates the type and depth of Pavilion Tender Intelligence analysis. No organisation, tender, value, requirement or finding in this report relates to a real procurement.

1. Executive assessment

A concise decision view showing why this opportunity deserves attention, what has been checked, and what still matters before a bid decision.

RECOMMENDATION	TENDER FIT	STRATEGIC FIT	EVIDENCE
STRONG MATCH — REVIEW FOR BID	89/100	HIGH	Opportunity: HIGH Client: HIGH

Pavilion recommendation — The opportunity is a strong match for the client’s core roofing activity, preferred North West geography and target contract value. Gate 1 and Gate 2 both PASS on the fictional evidence supplied. The main reasons for caution are the quality-heavy evaluation, resident-liaison burden and a liquidated-damages provision that falls within the client’s “Flag for Review” tolerance rather than an Absolute Exclusion. Pavilion recommends a formal bid / no-bid meeting after confirming bid-resource availability and pricing strategy.

Strong matches

Core work match	Planned pitched-roof renewal is a core service and closely matches recent reference projects.
Commercial scale	£1.85m estimated value sits within the client’s preferred £500k–£2.5m range.
Buyer and environment	Housing-association work and occupied residential delivery are both high-priority / evidenced capabilities.

Reasons not to bid / points of caution

Quality weighting	Award is 60% quality / 40% price. The client must invest in a strong methodology, resident-liaison and mobilisation response.
Liquidated damages	£1,000 per week is not an Absolute Exclusion in the client profile but requires commercial review before approval.
Programme intensity	Approx. 220 occupied homes over 24 months creates access, sequencing and resident-coordination pressure.

2. Opportunity snapshot

Contracting authority	Northborough Housing Partnership (fictional)
Tender title	Planned Roofing Renewal Programme — North Manchester Housing Estates
Notice / reference	NHP-RFQ-2026-041 (fictional)
Procurement stage	Open tender — tender pack reviewed

Estimated value	£1,850,000 excluding VAT
Contract duration	24 months; anticipated start 1 November 2026
Delivery location	North Manchester — four occupied housing estates
Tender deadline	25 September 2026, 12:00
Clarification deadline	16 September 2026, 17:00
Procurement route	Open procedure
SME suitability	Yes — explicitly stated
Primary source	Fictional procurement notice + tender pack for demonstration only

3. Two-stage qualification

Gate 1 asks whether the opportunity deserves the client's attention. Gate 2 asks whether, after reviewing sufficient tender documentation, the client should commit meaningful estimating and bid resource. A numerical score never overrides a confirmed hard failure.

Qualification check	Tender requirement	Client evidence	Result
Gate 1 — headline scope	Planned roof renewals to occupied social-housing stock	Roofing = Core; occupied residential = Yes	PASS
Gate 1 — geography / value	North Manchester; £1.85m	North West = Primary; preferred £500k–£2.5m	PASS
SSIP / competence	Current SSIP-equivalent accreditation required	Certificate verified in fictional evidence pack	PASS
Insurance	£10m PL; £10m EL; £2m PI where design applies	Verified fictional certificates meet / exceed limits	PASS
Relevant experience	3 comparable occupied-housing roofing projects in last 5 years	3 fictional references verified; values £0.95m–£1.70m	PASS
Principal Contractor	Bidder to act as Principal Contractor under CDM	Capability and recent experience verified	PASS
Design responsibility	Limited contractor-designed temporary works / details only	Client accepts limited design responsibility subject to scope	PASS
Resident liaison	Named resident-liaison process required	Client evidence shows dedicated RLO capability	PASS
Commercial exclusions	No bond/PCG/TUPE; LADs £1,000/week	No Absolute Exclusion triggered; LADs = Flag for Review	PASS
Gate 2 — overall	Mandatory requirements and client exclusions checked against tender pack	No blocking issue identified	PASS

Qualification conclusion — GATE 1 — PASS: strong published match with no known hard barrier. GATE 2 — PASS: the fictional tender pack and fictional client evidence have been checked against mandatory requirements and Absolute Exclusions; no blocking issue is identified. Proceed to formal bid review.

4. Tender Fit assessment

Tender Fit measures commercial and operational suitability against the agreed client profile. It is not a probability of winning.

Assessment category	Score	Pavilion assessment
Scope / capability match	24/25	Direct match with core planned-roofing capability; small associated works remain ancillary.
Geographic fit	10/10	North Manchester is within the client's Primary North West geography.
Contract value / capacity	14/15	£1.85m fits preferred range; programme requires controlled resource planning.
Relevant experience	13/15	Three strong comparable references; one is slightly smaller than the current programme.
Eligibility / procurement fit	10/10	Mandatory accreditations, insurance, PC role and references verified in the fictional evidence pack.
Timing / bidability	8/10	25-day tender period is workable but quality response requires early mobilisation.
Commercial attractiveness	6/10	LADs and 3% retention are acceptable only after review; quality burden is significant.
Strategic fit	4/5	Strong housing-sector alignment and potential repeat relationship value.
Tender Fit score — TOTAL: 89/100 Strong commercial fit. Score supports a bid review but does not override the specific commercial and bid-resource cautions identified below.		

5. Detailed client fit

Scope and capability	Planned renewal of pitched and low-slope roofing, rainwater goods and associated making-good. Roofing is a core client activity and the ancillary content is within normal delivery capability.
Geography	All estates are within the client's Primary North West operating area; no exceptional travel or mobilisation issue is identified.
Contract value and capacity	£1.85m sits comfortably inside the preferred range. The 24-month programme is manageable, but multiple

	live sites mean resource sequencing should be checked before bid commitment.
Buyer / sector fit	Housing association / social housing is a High-priority sector. Occupied residential delivery is an evidenced specialist capability.
Track record	Three fictional references demonstrate comparable planned roofing to occupied housing stock, including one Principal Contractor project at £1.70m.
Commercial appetite	3% retention and £1,000/week LADs are flagged for review but are not Absolute Exclusions. No performance bond, PCG, collateral warranty, novation or TUPE requirement is identified in the fictional pack.
Current strategic fit	High: the programme aligns with core roofing work, target buyer type, preferred geography and desired contract scale, with potential relationship value beyond the immediate contract.

6. Reasons to pursue and reasons not to bid

Reasons to pursue

Core scope	The principal work package is planned roofing renewal — the client's strongest stated work type.
Good evidence position	Comparable references, SSIP status, insurance and occupied-residential capability are already evidenced in the fictional client passport.
Commercially sensible scale	The value and duration are large enough to matter but remain within preferred parameters.
Strategic buyer fit	A successful housing-association programme could support repeat planned-maintenance opportunities.

Reasons not to bid

Quality burden	60% quality weighting means a weak written submission could outweigh a competitive price. Bid resource must be available.
LAD exposure	£1,000/week LADs are commercially acceptable only after director review under the client profile.
Occupied-site complexity	Resident access, missed appointments and sequencing across four estates create delivery risk not visible from the headline notice alone.
Margin discipline	Do not let the strategic fit justify aggressive pricing; preliminaries and resident-liaison costs need explicit allowance.

7. Evidence confidence, what the notice does not tell you & open questions

Opportunity Evidence Confidence	HIGH — fictional notice, specification, pricing schedule and contract particulars have all been reviewed.
Client Evidence Confidence	HIGH — fictional certificates and project evidence are assumed verified solely for this public demonstration.
What the tender notice does not tell you	The headline notice does not show the 60% quality weighting, 3% retention, £1,000/week LADs, resident-liaison obligations, sequencing constraints or the detail of the comparable-project requirement. These emerge only from the tender pack.
What remains unknown	Final subcontract strategy, current estimator availability, supplier pricing and the client's live workload at the intended start date.

Questions for the client	Confirm bid-team capacity; approve LAD/retention position; confirm named resident-liaison lead; confirm minimum target margin.
Questions for the buyer	Clarify whether roof areas may be handed over in phases and whether resident no-access delays receive programme relief.

8. Recommended next action

Immediate recommendation — STRONG MATCH — REVIEW FOR BID. Convene a bid / no-bid meeting within three working days. Proceed only if bid-resource capacity, target margin, LAD/retention tolerance and resident-liaison resource are confirmed.

Action checklist

Confirm estimator and bid-writer capacity	Commercial Director — within 2 working days
Approve LAD / retention risk position	Director — before bid launch
Confirm delivery lead + resident liaison resource	Operations — before methodology drafting
Formal bid / no-bid decision	Within 3 working days or before clarification deadline, whichever is earlier

9. Source trail

Illustrative sources below are fictional but show the evidence trail Pavilion would retain in a live assessment.

#	Source	Type	Date checked	What it supports
1	Northborough Housing Partnership — Contract Notice NHP-RFQ-2026-041	Primary (fictional)	31/08/2026	Scope, value, geography, deadline, SME suitability
2	Invitation to Tender	Primary (fictional)	31/08/2026	Evaluation model, submission requirements, timetable
3	Works Specification	Primary (fictional)	31/08/2026	Roofing scope, occupied-site obligations, programme constraints
4	Contract Particulars	Primary (fictional)	31/08/2026	Retention, LADs, insurance, contract conditions
5	Selection Questionnaire / Conditions of Participation	Primary (fictional)	31/08/2026	SSIP, reference and Principal Contractor requirements
6	Northfield Roofing & Building — Tender Profile v1.0	Client (fictional)	31/08/2026	Work appetite, geography, value range, commercial tolerances
7	Northfield Capability & Evidence Passport	Client (fictional)	31/08/2026	Accreditations, insurance, experience, resident-liaison evidence
8	Pavilion Tender Intelligence Methodology v1.1	Internal method	31/08/2026	Gate logic, scoring, confidence and adversarial review

10. Client decision and feedback

Completed after delivery where the client provides a bid / no-bid decision and, later, an outcome. This creates the learning loop for future assessments.

Client decision	Illustrative example — not completed
Decision date	—

Reason	—
Outcome	—
Outcome notes	In a live engagement Pavilion can record Bid / No Bid / Won / Lost / Withdrawn feedback to improve future qualification.
Profile review needed?	No change demonstrated in this example.

11. Important notes and professional status

This illustrative report is commercial decision-support material. In live work, procurement information may be incomplete, amended or superseded after the report date; Pavilion therefore records the source and date of material relied upon.

The Tender Fit score measures how closely an opportunity appears to match the client's agreed Tender Profile. It is not a prediction of contract award or a probability of winning.

Clients remain responsible for deciding whether to participate in a procurement process or submit a tender and should review the complete procurement documents before doing so.

Pavilion (Stockport) Ltd is not a firm of solicitors and does not provide reserved legal services. Where specialist legal advice or representation is required, appropriate professional advice should be obtained.
